The attendance of museums and galleries in England.

Introduction.

English museums and galleries offer their visitors a chance to see various works, which can interest many people. These museums are very popular with both tourists and English citizens. In this report, the data on English museums and galleries for three separate years was collected in order to analyze the attendance.

The good news.

First of all, the good news are that in general the attendance of English museums and galleries has increased since 2013. 3 from 5 museums proof this information. For example, the attendance of the British Museum has changed from 2,6 mln in 2013 to 5,6 mln in 2017.

The meaning of the recent changes.

Nevertheless, there are 2 museums which demonstrate disappointing results - the Science Museum and the Natural History Museum. There is a reason of such contradiction between them and the remaining museums. The problem is that these museums introduced admission charges in 2014. As a result, the attendance of the Science Museum has changed from 3,8 mln in 2013 to 1,6 mln in 2017.

The recommendations.

The report strongly proves that the admission charges should not be introduced in museums and galleries as it leads to declination of the attendance. Also, it would be useful to spread more information about
